

For the new proposal we're using a version control device (**Git**) handling all of our proposal related files. For this, your computer needs to have the appropriate apps installed (**Git & TortoiseGit**). As we use LaTeX as text software tool we also need a LaTeX editor (**TeXmaker**) and a pdf-maker software (TeX-interpreter called **MikTeX**).

For installing all of this, the following sections have been set up.

**Page 2 – 4: Setup Git Account**

**Page 5 – 10: Installation Git**

**Page 11 – 16: Installation TortoiseGit**

**Page 17 – 21: Installation MikTeX**

**Page 22 – 23: Installation TeXmaker**

## Setup Git-Account:

For **non-RWTH** members:

- a) Create an account on <https://github.com/>
- b) Send the E-mail you used to create the account to [koch@wsa.rwth-aachen.de](mailto:koch@wsa.rwth-aachen.de) or [pielsticker@wsa.rwth-aachen.de](mailto:pielsticker@wsa.rwth-aachen.de)
- c) Switch to [https://git.rwth-aachen.de/users/sign\\_in](https://git.rwth-aachen.de/users/sign_in) and select "Sign in with GitHub"

### GitLab of the RWTH Aachen University

#### Willkommen beim GitLab der RWTH Aachen!

Angehörige der RWTH Aachen (Studierende und Mitarbeitende), sowie Angehörige von Universitäten aus dem NFDi4ing nutzen bitte ausschließlich den **DFN AAI Single Sign-On** und wählen im darauffolgenden Fenster Ihre Universität aus. Als Student der RWTH Aachen

- d) Enter your github-email and your github password
- e) Skip page 3

**For RWTH members:**

- Send your RWTH working mail to [koch@wsa.rwth-aachen.de](mailto:koch@wsa.rwth-aachen.de) or [pielsticker@wsa.rwth-aachen.de](mailto:pielsticker@wsa.rwth-aachen.de) (e.g. [#@wsa.rwth-aachen.de](mailto:#@wsa.rwth-aachen.de) / [#@aia.rwth-aachen.de](mailto:#@aia.rwth-aachen.de) / [#@itv.rwth-aachen.de](mailto:#@itv.rwth-aachen.de) )
- Switch to [https://git.rwth-aachen.de/users/sign\\_in](https://git.rwth-aachen.de/users/sign_in) and select DFN AAI Single Sign-On

## a) Switch to “Settings” (upper right corner)

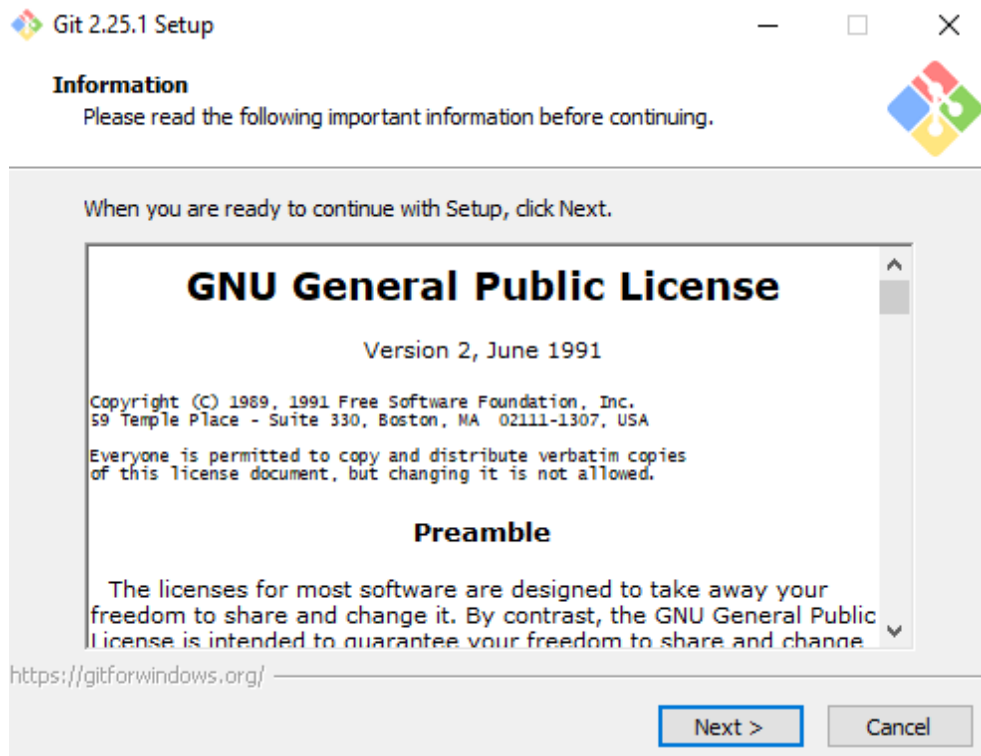

## b) Set and save new password

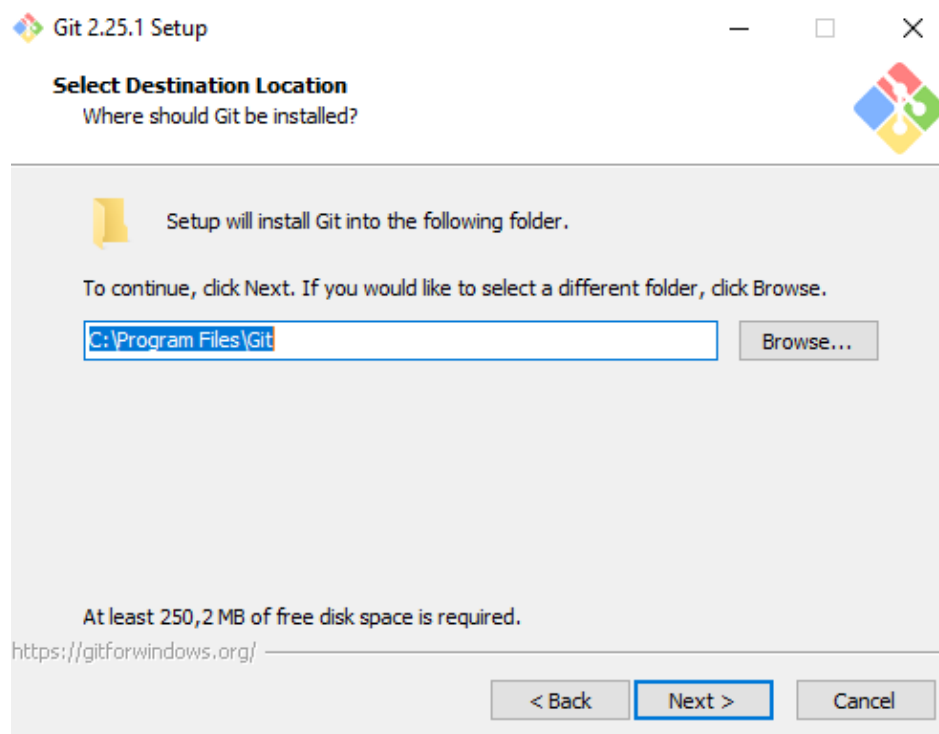

## Installation Guide of Git

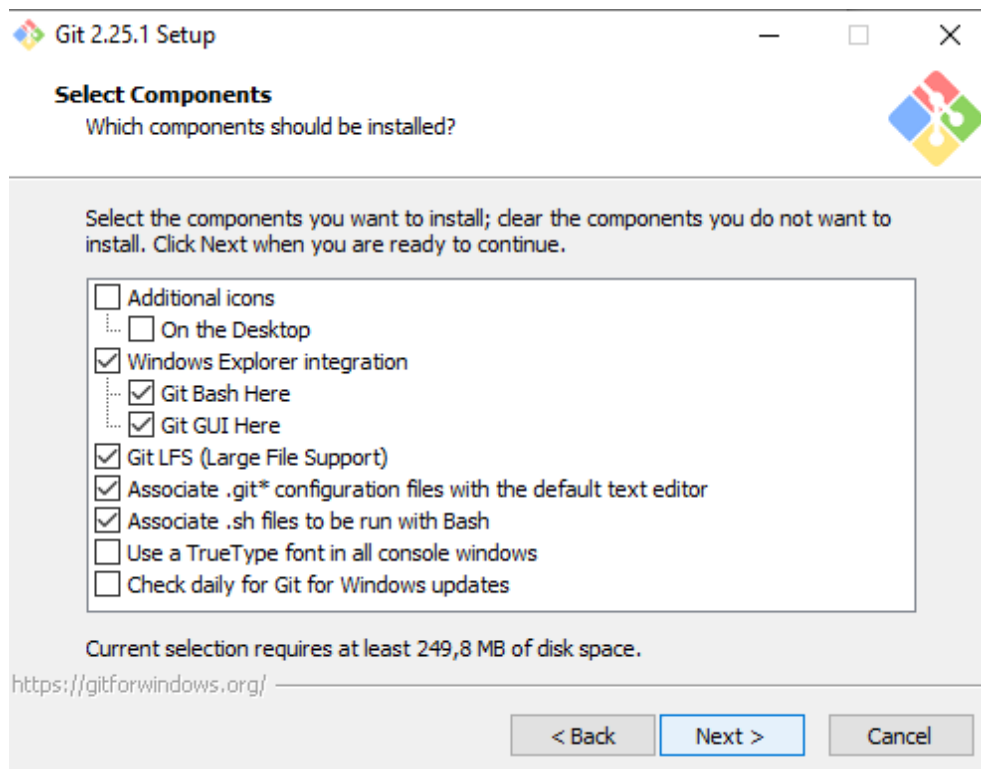

1. Download git on <https://gitforwindows.org/>
2. Start installation by double clicking the downloaded file
3. Press Next

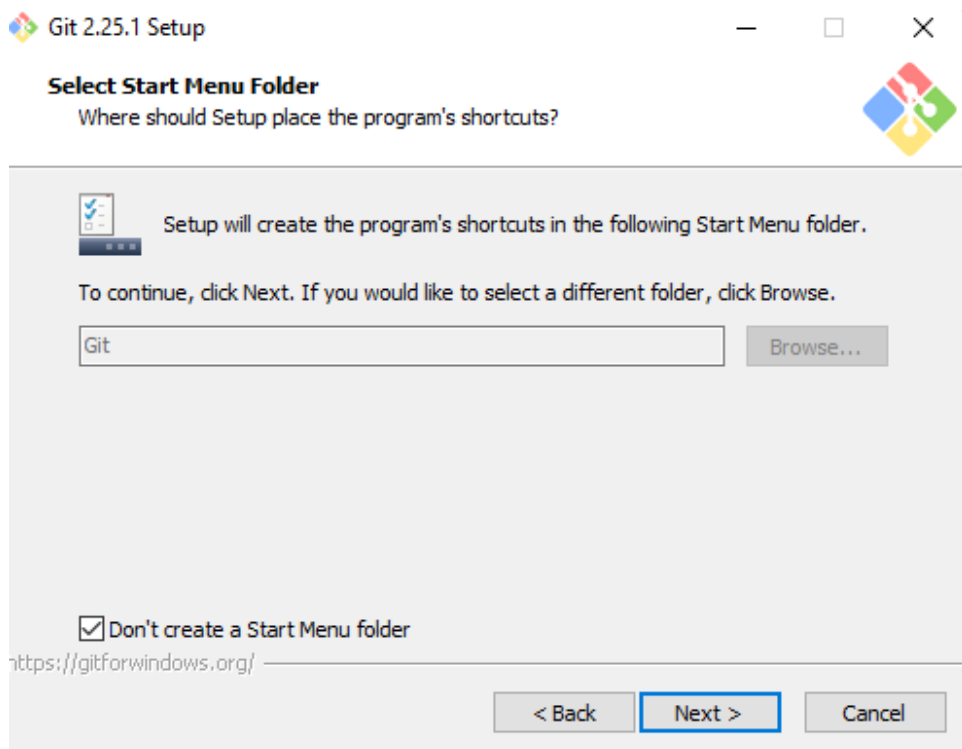

4. Choose installation directory and press Next

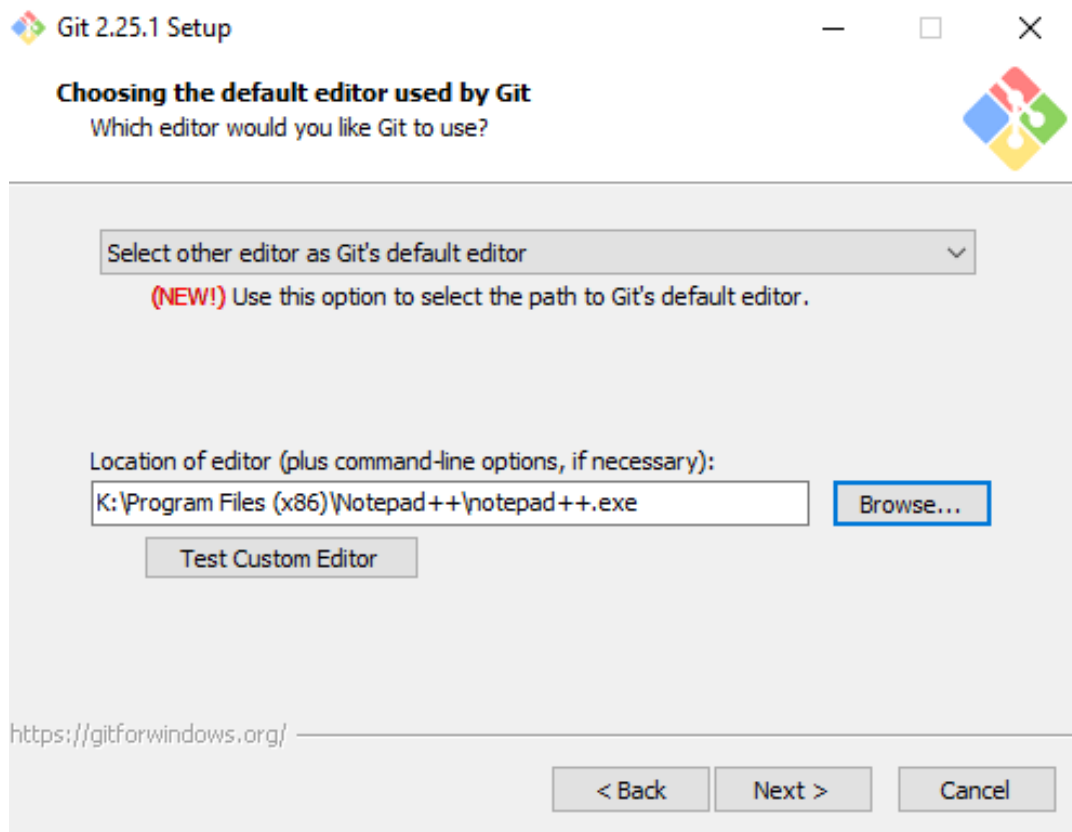

5. Check the shown check boxes and press Next

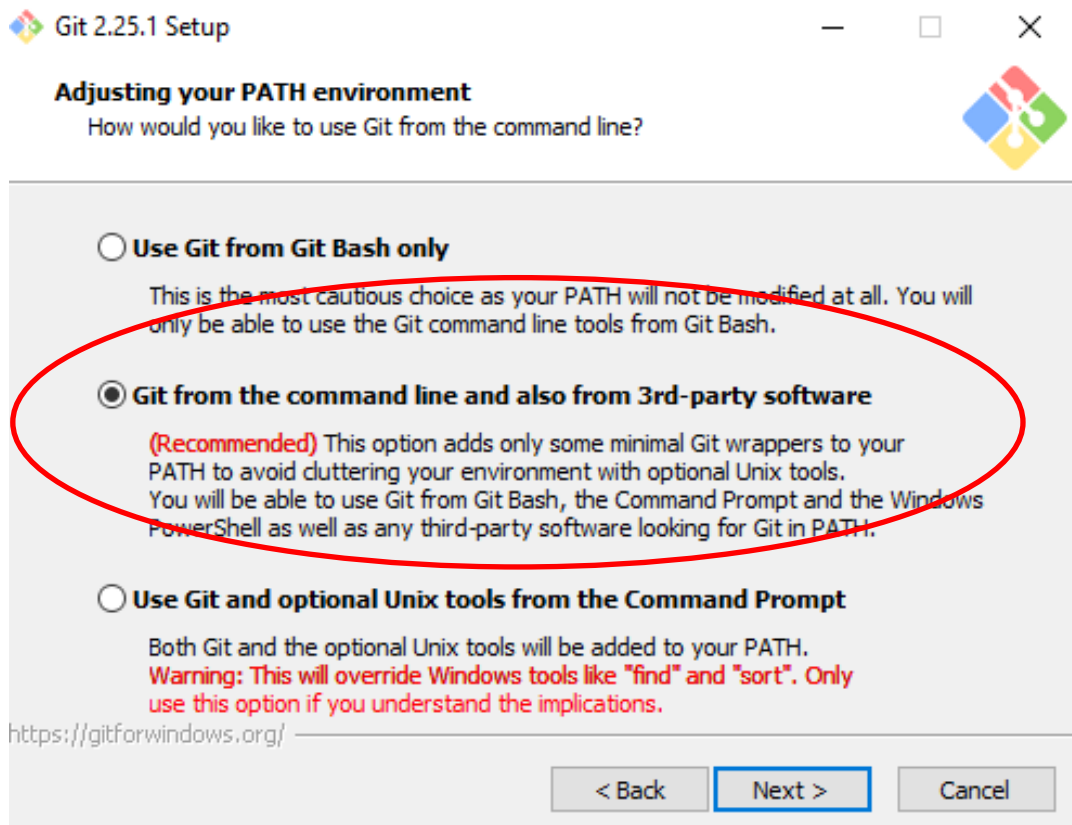

6. Check "Don't create a Start Menu folder" and Press "Next >"

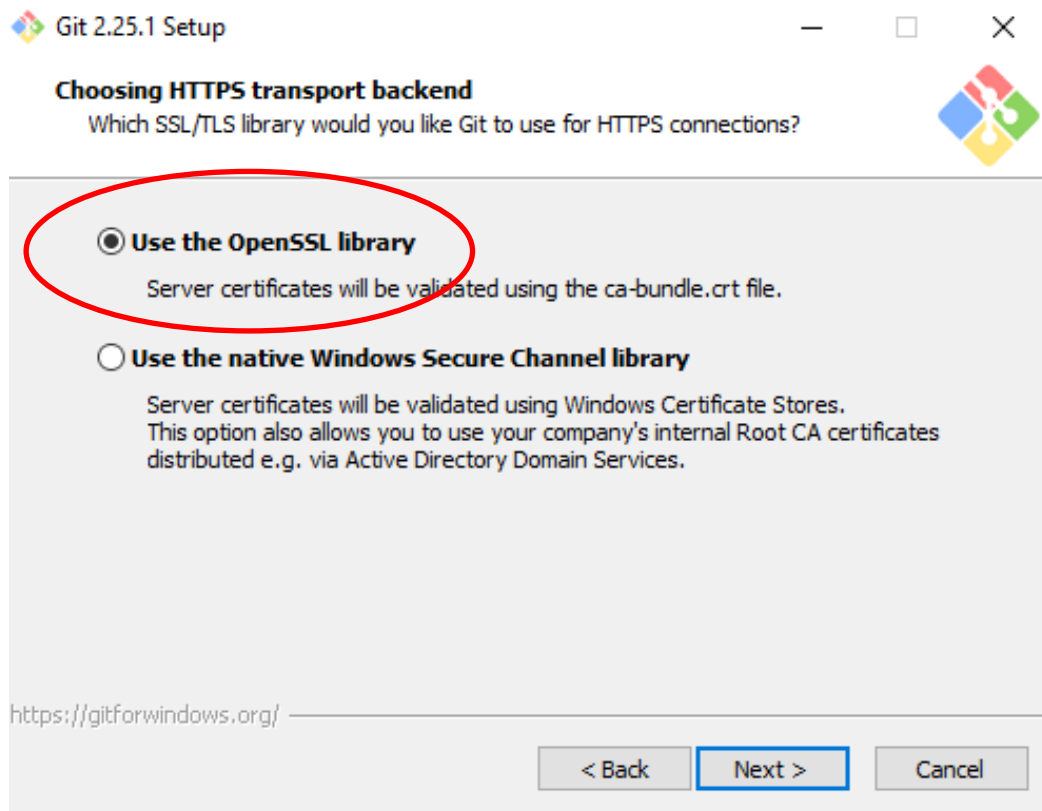

7. Press Next >” it is not necessary to choose an editor

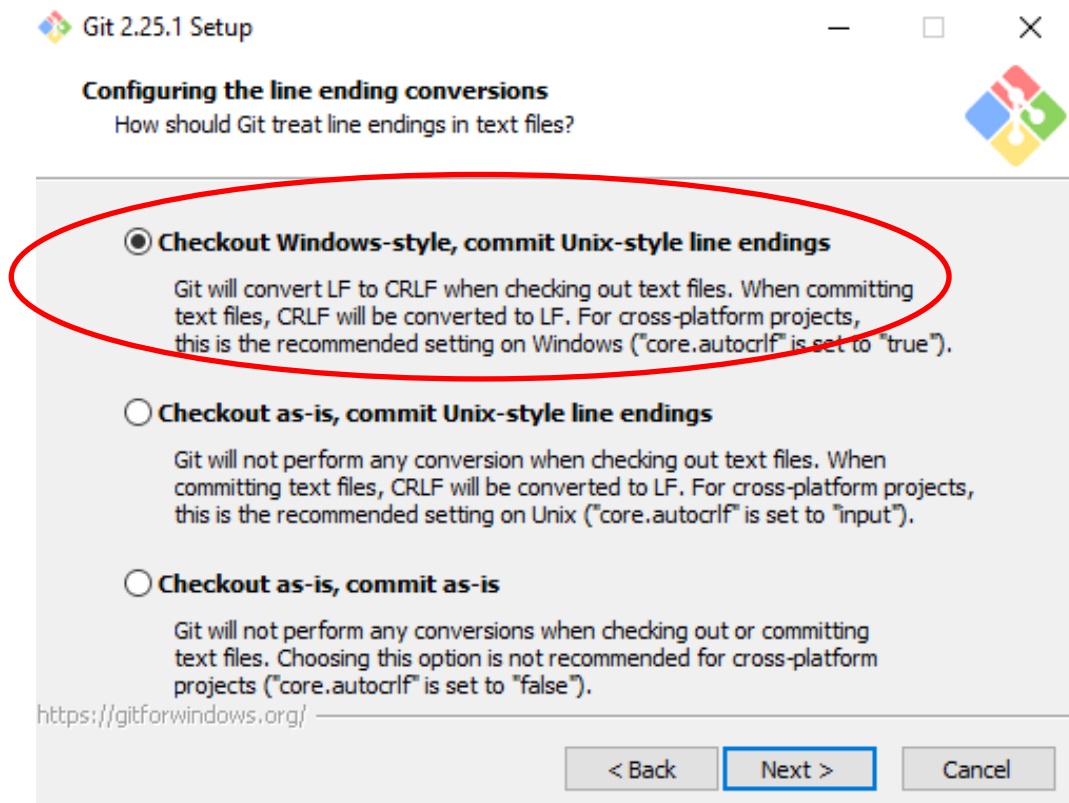

8. Check the second option and press Next

## 9. Check first option and press Next

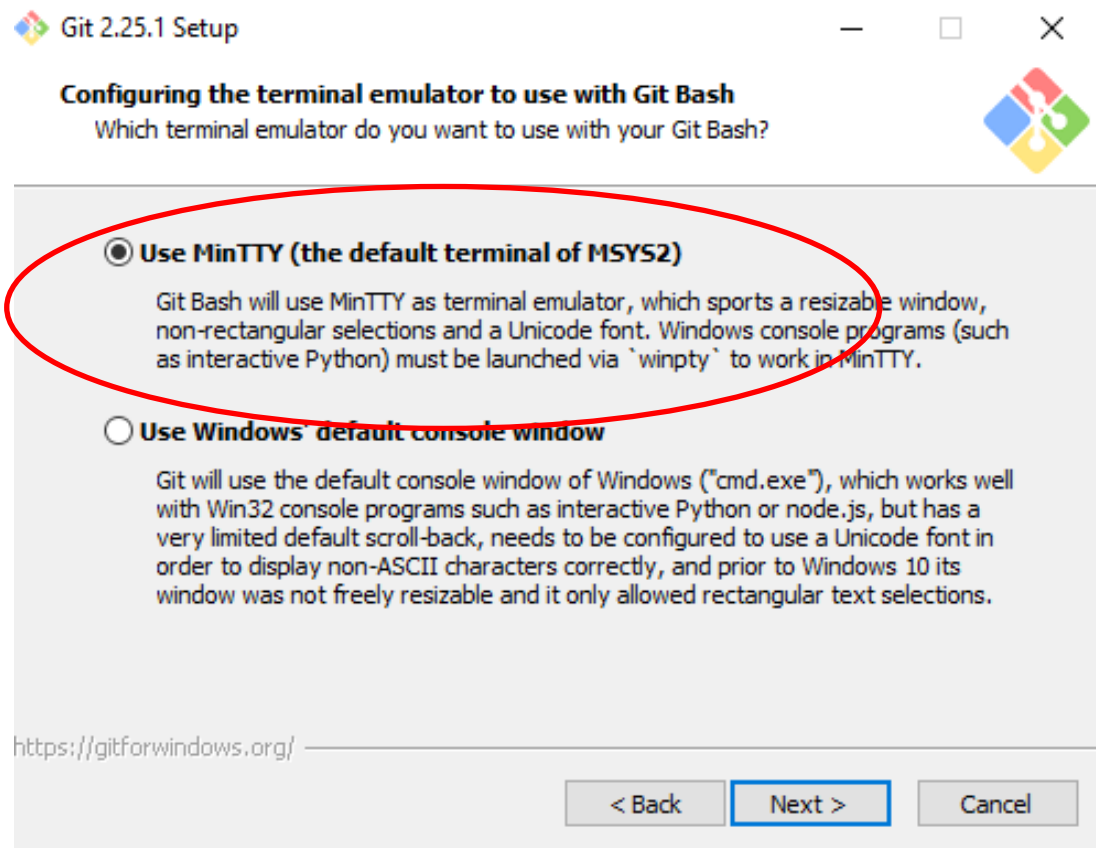

## 10. Check first option and press Next

11. Check the first option and press Next

12. Check first and second option and press install

13. The installation of Git will run now

14. Restart your computer

---

## Installation of tortoiseGit:

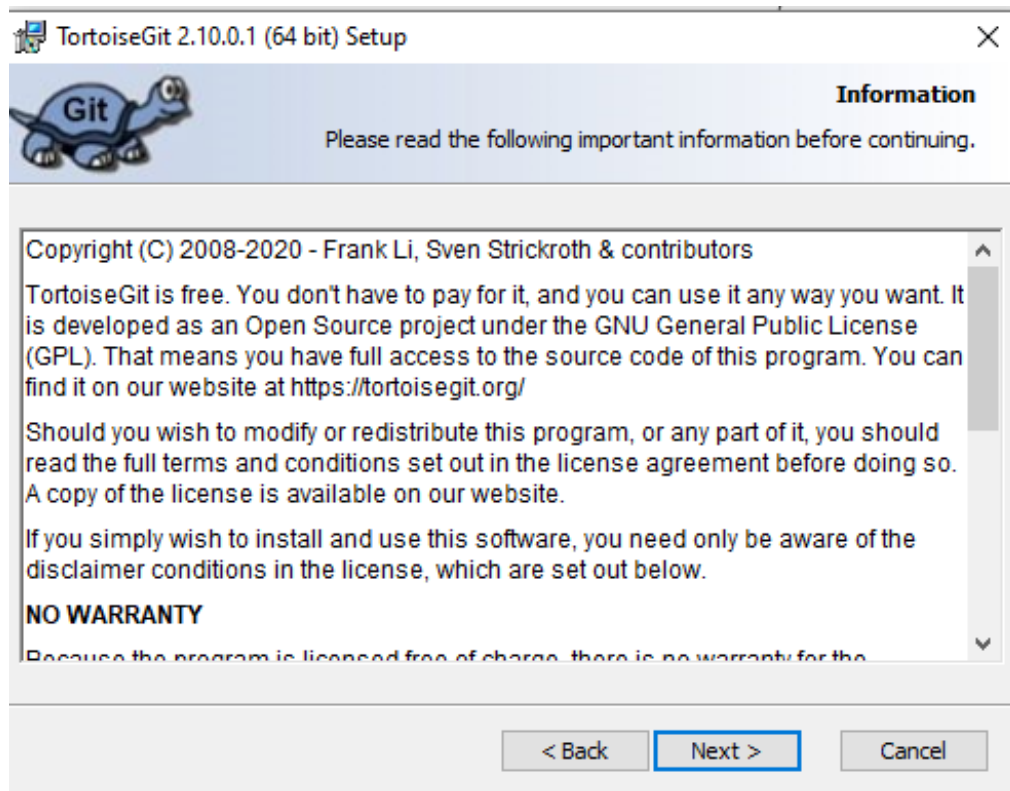

1. Download tortoiseGit on <https://tortoisegit.org/download/>

Depending on your system download 32-bit or 64-bit version. If you don't know your systems version: Double click Workstation, right click and choose properties and check your system.

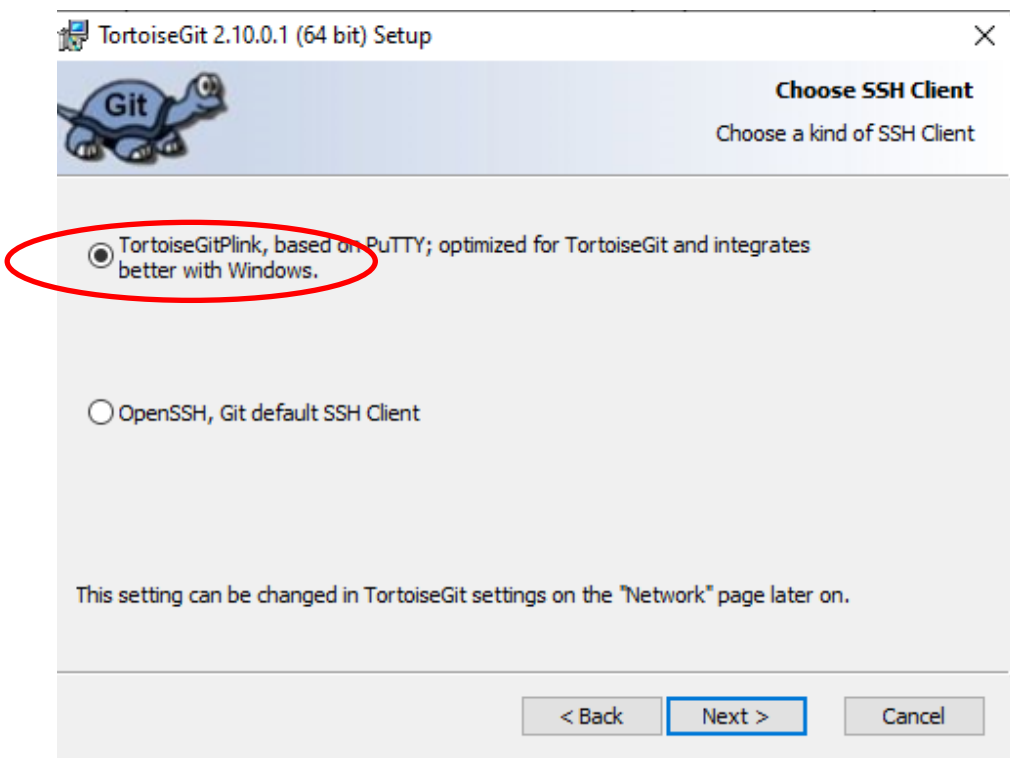

2. Start the installation by **double clicking the downloaded file**
3. Click Next

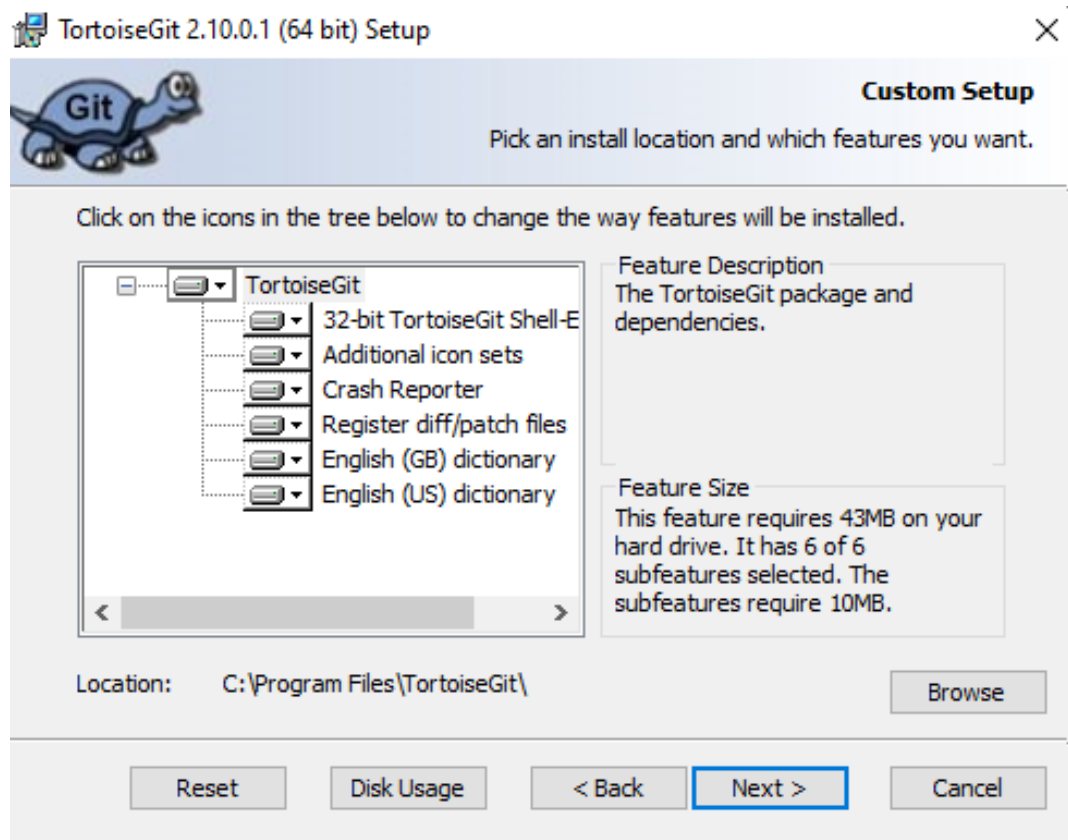

## 4. Click Next

## 5. Check first option and click Next

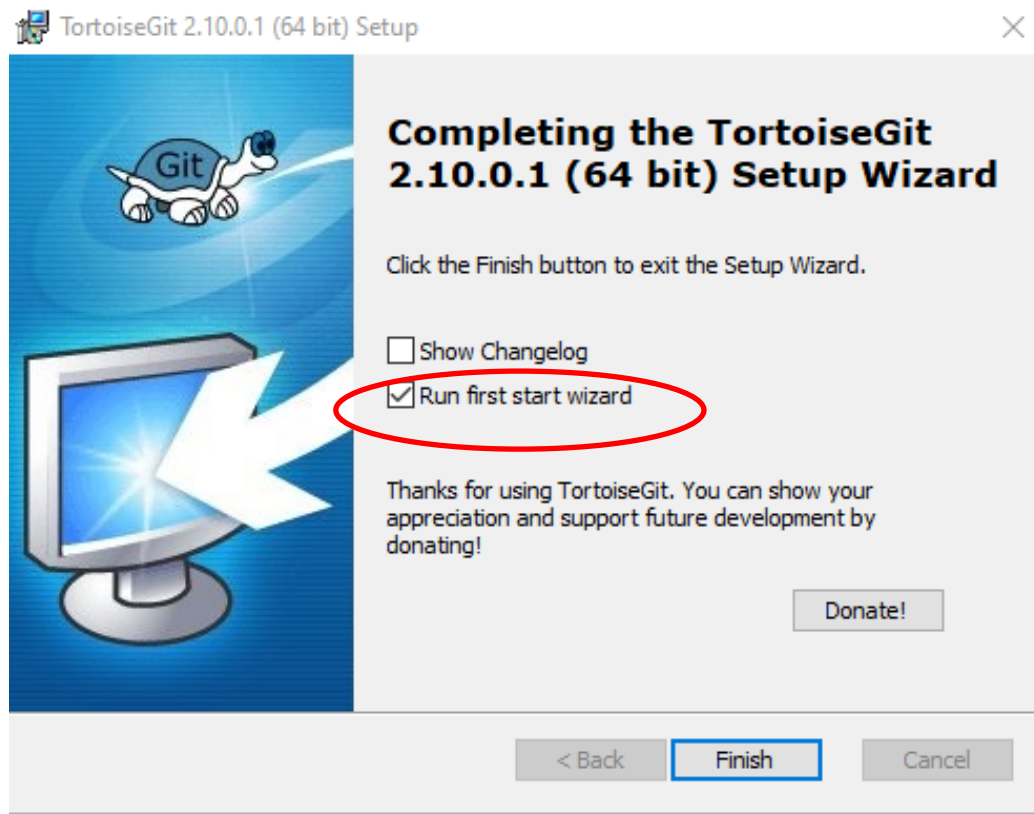

## 6. Choose directory and click Next

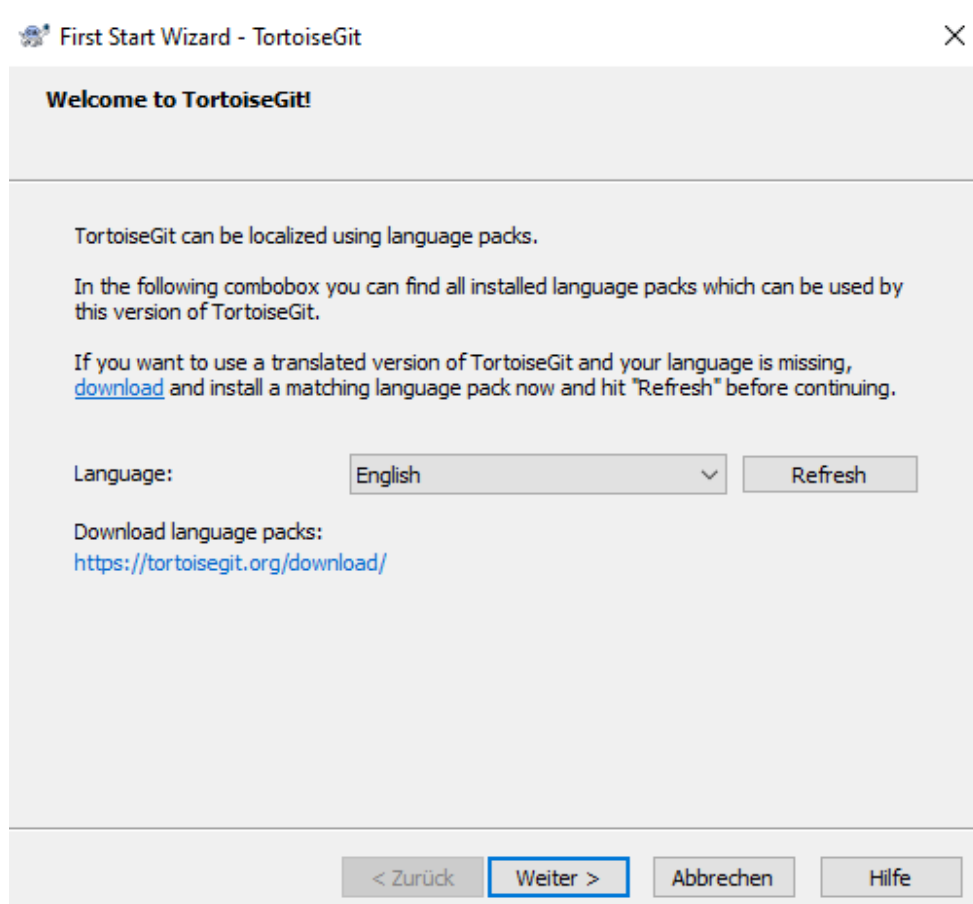

## 7. Click install

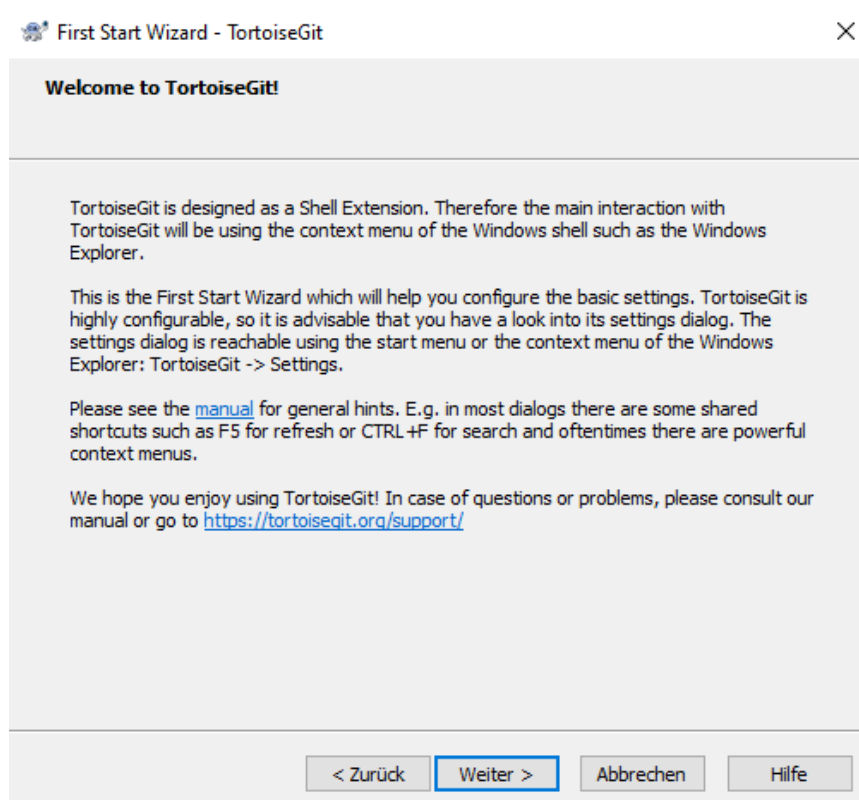

## 8. Check second option and click finish

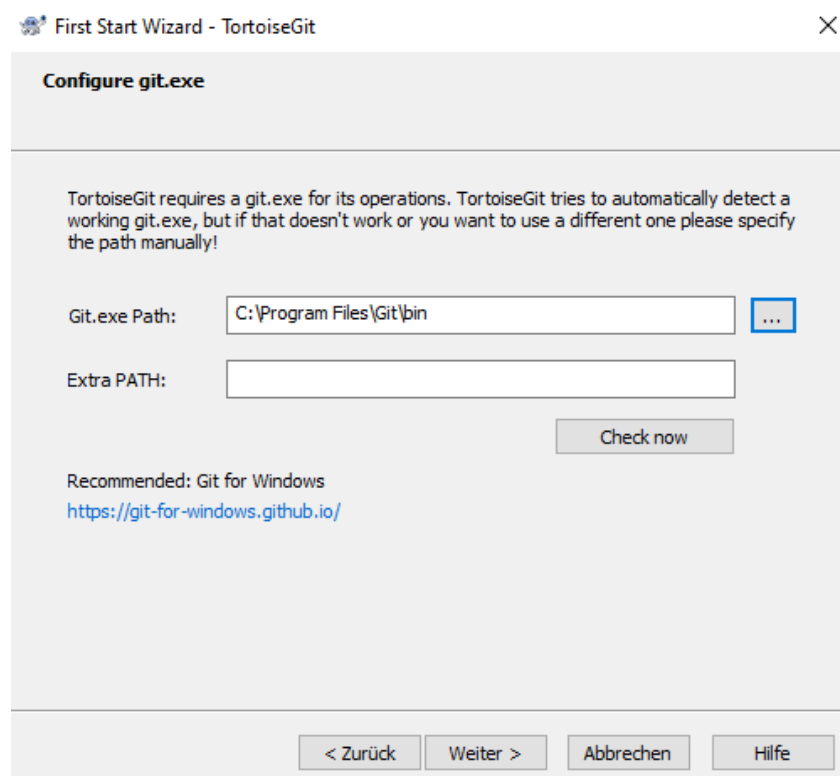

## 9. Choose English and press Next

## 10. Press Next

## 11. Choose installation directory of git.exe (first program that was installed) and press next. Normally you shouldn't have to choose the directory and the installation guide found the correct path by itself

12. Configure user information. Here, you should enter the email of your Github-account (or as RWTH-Member your working mail [#@wsa.rwth-aachen.de](mailto:#@wsa.rwth-aachen.de) / [#@aia.rwth-aachen.de](mailto:#@aia.rwth-aachen.de) / [#@itv.rwth-aachen.de](mailto:#@itv.rwth-aachen.de) )

First Start Wizard - TortoiseGit

**Configure user information**

Git requires that you set up a user name and email address. Both are used as meta data for your commits (not for authentication).

Name: Matthias Koch

Email: koch@wsa.rwth-aachen.de

These settings will be stored to your global git configuration (%HOME%/.gitconfig) and will be used for all your git repositories as a default.

☐ Don't store these settings now.

< Zurück Weiter > Abbrechen Hilfe

13. Choose the shown options and finish

First Start Wizard - TortoiseGit

**Authentication and credential store**

SSH (URLs look like "git@example.com")

TortoiseGitPlink Generate PuTTY key pair

HTTP (URLs start with "http://" or "https://")

manager Advanced...

☒ Don't store these settings now.

These settings will be stored to your global git configuration (%HOME%/.gitconfig) and will be used for all your git repositories as a default.

## Installation of Latex

For the generation of your Latex document a TeX distribution and an editor are required. Popular editors are Texmaker or Texstudio. You can also use other editors of your choice. Here, we will explain the use of Texmaker. As TeX distributions, there exist MiKTeX and TexLive. Both distributions will work with the proposal, but here the use of MiKTeX is explained.

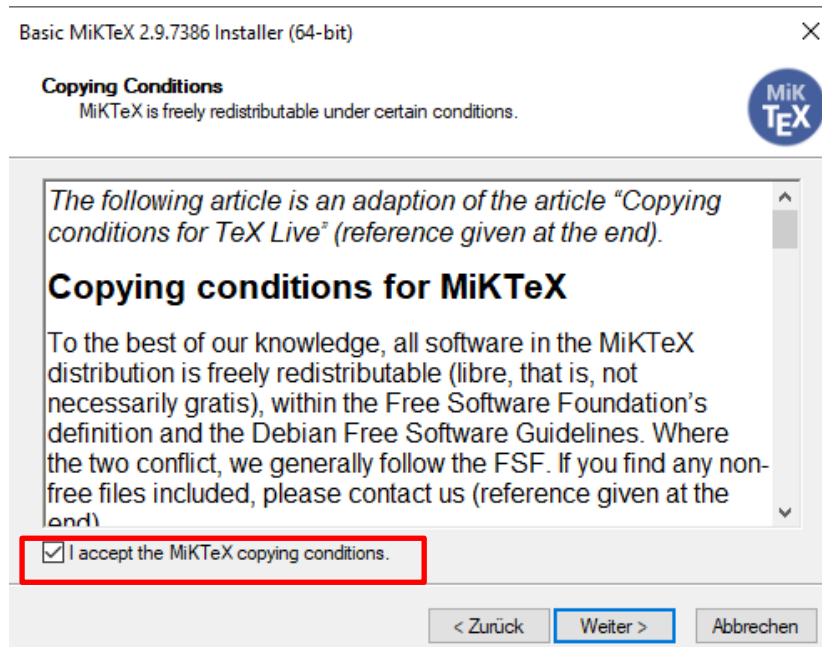

### Installation von MiKTeX 2.9

1. Download the MiKTeX setup file on <https://miktex.org/2.9/setup>. Depending on your sestylms version you need to download either 32-bit or 64-bit version. (Double click Workstation. Right click and choose properties and check system)

#### MiKTeX 2.9 Setup

Basic Installer	64-bit Version
To install a basic TeX/LaTeX system on Windows, download and run this installer. Date: 3/23/2020 File name: basic-miktex-2.9.7386-x64.exe Size: 232.03 MB <a href="#">Download</a>	
Basic Installer	32-bit Version

2. Afterwards execute the downloaded file - *basic-miktex-2.9.7386.exe* (32-bit) or *basic-miktex-2.9.7386-x64.exe* (64-bit) – and follow the instructions (ignore Windows warning):
  - a. Check option „I accept the MiKTeX copying conditions“ and click „Weiter >“

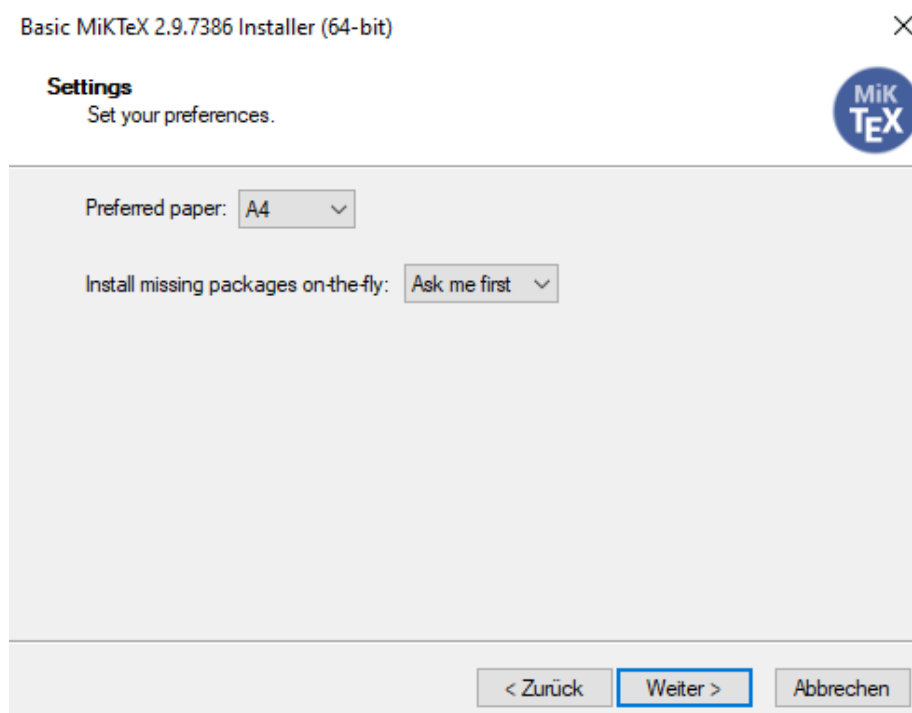

- b. Check option „Anyone who uses this computer (all users)“ and click „Weiter >“

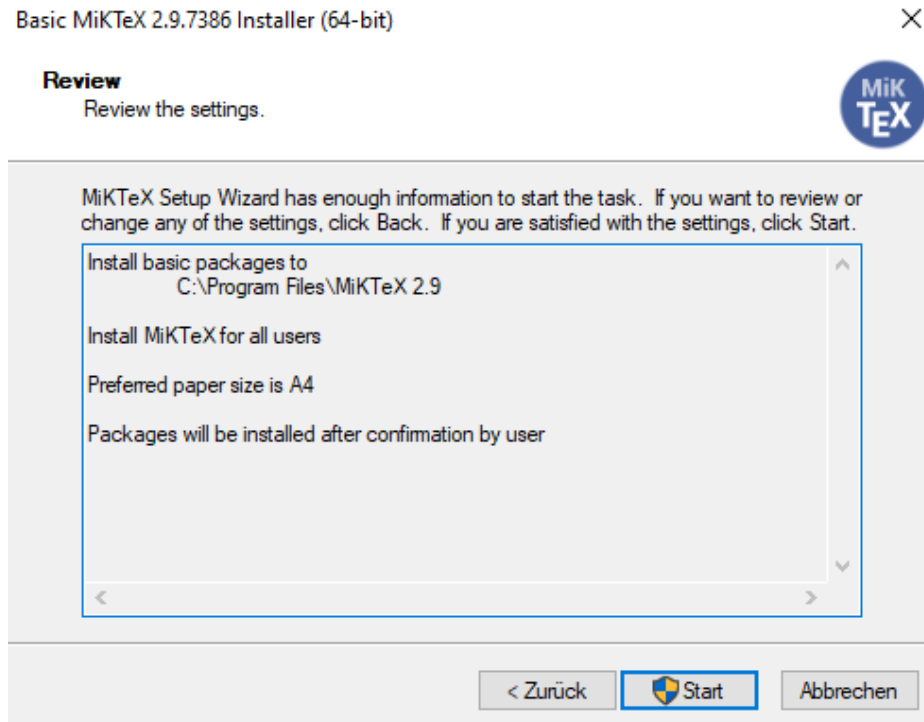

c. Set „Installation Directory“ and click „Weiter >“

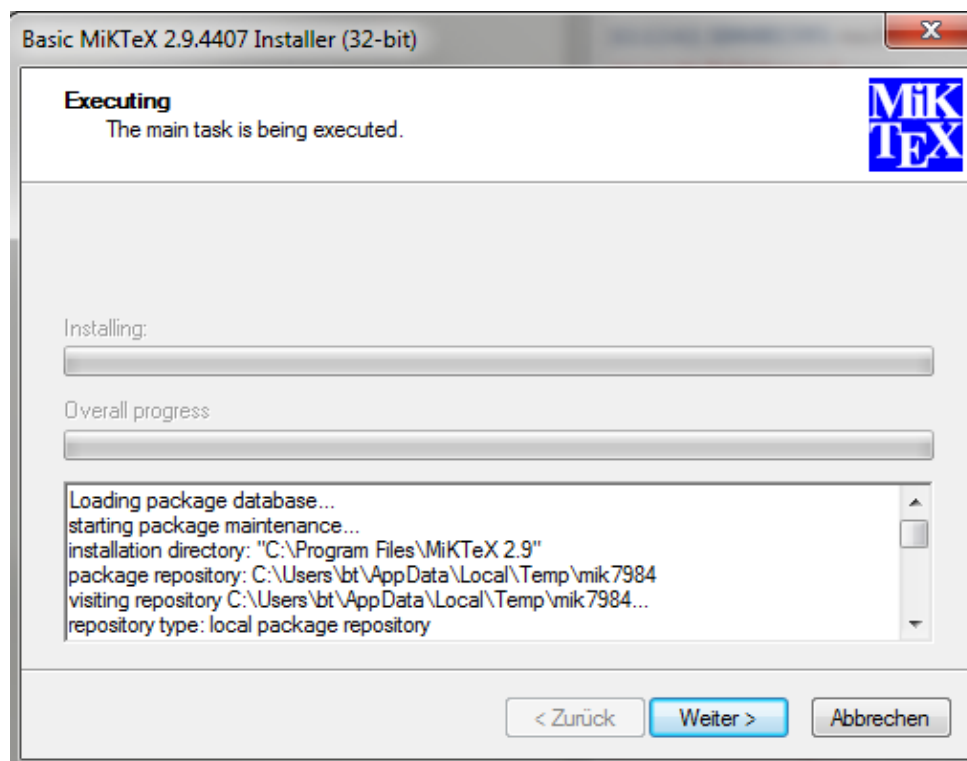

d. Maintain standard settings and click „Weiter >“

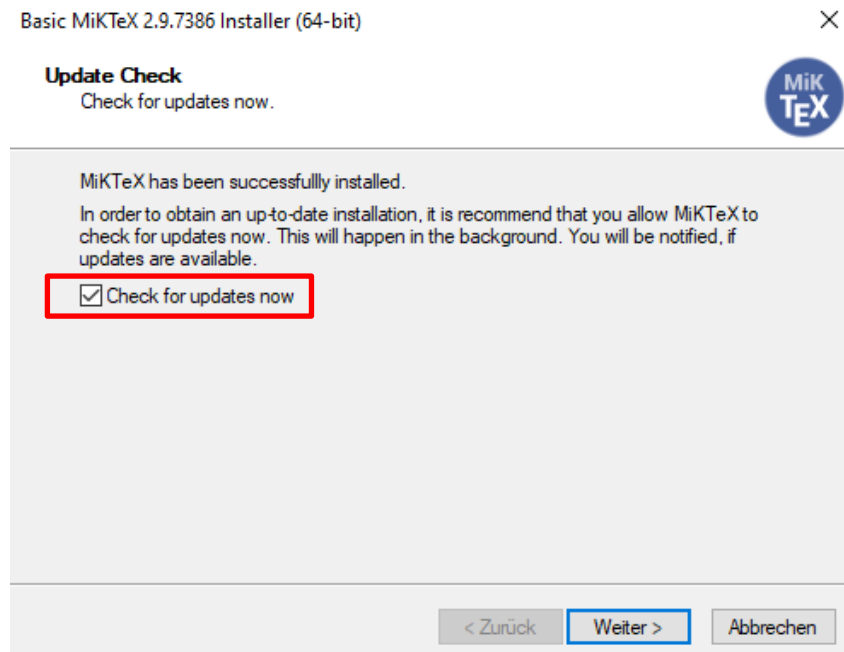

e. Click “Start”

f. Click „Weiter >“

- g. Check the box “Check for updates now” and press “Weiter”

- h. Click „Close“ to finish the installation

## Installation of Texmaker

1. After successful installation of MikTeX, the TeX editor “Texmaker” needs to be installed. Download the setup file on <http://www.xm1math.net/texmaker/download.html> . The newest version (5.0.4) is only available for 64-bit systems. If your system does not support 64-bit version download Texmaker 4.5 version

2. Execute the downloaded file and follow the instructions:
  - a. Check „I accept the terms in the License Agreement” and press Install

- b. Check „Launch Texmaker when setup exits” and click Finish
